
eBioscience™ Fixation/Permeabilization Diluent

Catalog Number: 00-5223

For Research Use Only. Not for use in diagnostic procedures.

Product Information

Contents: eBioscience™
Fixation/Permeabilization Diluent
REF **Catalog Number:** 00-5223

Temperature Limitation: Store at 2-8°C.

Batch Code: Refer to vial

Use By: Refer to vial

Contains sodium azide

Description

The Fixation/Permeabilization Diluent is intended to be used with antibodies to transcription factors and nuclear proteins, such as Foxp3 and Ki-67, as well as cytokines and chemokines. This must be used in combination with the Fixation/Permeabilization Concentrate (cat. 00-5123) and the Permeabilization Buffer (10X) (cat. 00-8333). Alternatively, all buffers required for staining with these antibodies can be purchased as a set in the Foxp3/Transcription Factor Buffer Staining Set (cat. 00-5523).

Please see our Best Protocols section for more information.

Applications Tested

This has been tested by intracellular staining and flow cytometric analysis using Best Protocols: Protocol B: One-step protocol for intracellular (nuclear) proteins.

This diluent is intended to be used in combination with the Fixation/Permeabilization Concentrate (cat. 00-5123). Mix 1 part of Fixation/Permeabilization Concentrate with 3 parts of Fixation/Permeabilization Diluent.
